How to set up InkPot ICC profile for SG400/SG800 in Corel Draw on Windows

Step 1: Download and move the profile

- 1. Download the profile from our website or that was emailed to you from us.
- 2. Once downloaded, you will need to move the file to the system folder on your computer where all of your profiles are stored. The location will depend on what version of Windows you are running.

Refer to the list below:

Windows 98/ME C:\Windows\System\Color\

Windows XP/Vista/7/8/10 C:\Windows\System32\Spool\Drivers\Color\

Step 2: Set up the profile

Understanding color management settings	Profiles

- 4. Under the *Devices* tab (4a), in the *Device* dropdown menu (4b), select the Sawgrass SG400 RPCS-R or SG800 RPCS-R printer.
- 5. Check the box labeled *Use my settings for this device*.
- 6. For Profile selection, choose Manual.
- 7. Click on Add...
- 8. Click on the profile you just downloaded and the click OK.
- 9. Select the added profile then click on *Set as Default Profile*.
- 10. Click Close.

Step 3: Set up Corel Draw

Press File and then Print to enter the print dialog window shown below. Please follow the steps listed below:

Print X	Print 7 2	x
General Color Composite Layout Prepress 1 Issue	General Color Composite Layout Prepress 1 Issue	
Destination Printer: 1 Sawgrass SG400 RPCS-R 7 9	Color: © <u>C</u> omposite <u>S</u> eparations

Print as bitmap: 300 dpi Print style: Custom (Current settings not saved) Save As 8 ? Print Preview Print Cancel Apply	The color settings and preview available in this dialog box are set for the Windows Graphic device printer that you selected on the General tab. Print Preview Print Cancel	

- 1. If not already there by default, select the *General* tab and select the Sawgrass SG400 RPCS-R or SG800 RPCS-R as your printer.
- 2. Select the Color tab. If your version of Corel lacks the Color tab, skip directly to step 9.
- 3. Set Color Conversions to the SG400 RPCS-R or SG800 RPCS-R.
- 4. Set *Color profile* to the same profile as the document or to an RGB Profile like sRGB IEC61966-2.1.
- 5. Preserve pure black should be unchecked.
- 6. Set *Rendering Intent* to Relative Colorimetric.
- 7. Select the General tab again.
- 8. To avoid having to do all this each time you print, we recommend saving these settings as a Print Style by clicking the *Save As…* button:
 - a. Select a name you want the Print Style to have.
 - **b.** Press *Settings…*
 - c. Check the same boxes as indicated in picture 8c then click OK.

9. Press the Gear symbol next to the printer to complete the driver settings (go to next page).

Step 4: Set up the driver for ICM mode

Once in the Printing Preferences menu, follow the steps below to ensure you are printing with the optimal print settings for our profile.

- 1. In the *Paper Type* dropdown menu, select the option *Postcard*.
- 2. In the *Select Print Quality* dropdown menu, select the option *High Quality*.
- 3. Click on the *Detailed Settings* tab.
- 4. In the *Menu:* list of options, select the option *Print Quality*.
- 5. In the *Color Profile:* dropdown menu, select the option *Use ICM*.
- 6. In the *Gray Reproduction:* dropdown menu, select the option *CMYK for Image.*
- 7. Go back to the original screen by clicking on One Click Presets.
- 8. Click on *Register Current Settings...* so that you can save these settings as a preset for your convenience later.
- 9. Press OK to apply these settings.

Press print! The profile will be applied to your design as it is sent out to the printer. Don't forget to mirror your images before-hand if required!
